Why me?

I can work with attention to detail and quality. I can learn new things quickly and adapt to new environment. I can create good solution based on requirements on constraints effectively and efficiently.

Skills (in detail)

My journey as an engineer makes me have opportunity to get in touch with several tools, programming language or libraries that maybe fits with your organization. Here is the detail.

Programming Language/Framework:

- PHP, Symfony, Laravel, JavaScript, HTML, CSS

Database:

- MySQL, ArangoDB (nosql)

Cloud Platform:

- AWS, GCP (mostly on Linux platform)

Development tools and others:

- Ansible, Docker, Puppeteer, APIs, Git, data scraping

Other stack/technology maybe still not used frequently during my career journey, such as Go or React, but I can learn to fit your needs.
